

My Story, 2010

Over a year ago, I had sharp stabbing pains in my hips along with major pain in my feet and legs which all made me hump over like an "old" lady and walk by inches. The only relief I had was to take 9 Advil a day which I did not like because of the damage it could cause my liver. At 60 years old I thought I was too young to feel old.

Then I discovered Isotonix and the antioxidant called OPC3 which relieved major pain within weeks, relieved other pains (Bursitis) within a month and "oiled" my knee joints that I did not realize were giving me trouble too. I felt so young, so good, that I decided to promote these products to help others feel great too.

As I grow older, I am finding the more natural means of health are helping me. I recommend, good nutrition, supplements (in Isotonix form), a colon cleanse, moderate exercise (like walking/biking) yoga and if you can, an occasional healing massage from a good therapist. You might want to try my Isotonix products or another's, but in the end I pray you find perfect health.
